

## DEVELOPING RESILIENCE AND SUSTAINABILITY GUIDANCE FOR THE NJ HIGHLANDS REGION

*Highlands Resilience Project Practitioner Panel*

# Planning for Sustainability & Climate Change in the Highlands

Please attend an informational meeting about a new initiative of the New Jersey Highlands Water Protection and Planning Council (Highlands Council) to provide guidance for municipalities in the Highlands Region on planning for sustainability and climate change.

The Highlands Council is working with New Jersey Future, Sustainable Jersey, Brownfield Redevelopment Solutions, and The Land Conservancy of New Jersey to develop Highlands-specific municipal guidance for achieving compliance with recently updated legislative and policy requirements on sustainability. These updates require that municipalities conduct climate change-related hazard vulnerability assessments and incorporate climate resilience, environmental justice, and environmental sustainability into community master plans.

As municipal leaders and planning experts practicing in the Highlands Region, we believe your input is vital to this effort.

*Please join us for a virtual meeting on:*

**Thursday, January 26, 2023 at 12pm to 1:15 pm EST**

*The meeting presentation will describe the guidance under development and include time to ask questions and offer comments.*
